

SEBASTIAN ARIAS ARIAS

Full Stack Software Engineer

Armenia, Quindío, Colombia | sebasarias78@gmail.com | +57 301 661 1852 | linkedin.com/in/sebastian-arias-dev

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience leading end-to-end web product development: architecture, data, integrations and production deployment. Specialized in React, Next.js, TypeScript, NestJS and Node.js. Contributed to platforms serving 12,000+ users, 300+ clubs and 100+ institutions, making technical decisions on architecture, performance, caching and data processing. Direct experience working with clients and technical teams: requirements gathering, presenting solutions, technical advisory and onboarding new team members. Fast learner, self-taught, and driven to solve complex problems with sound technical judgment.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, TanStack Query, Framer Motion, GSAP

Backend: NestJS, Node.js, Express, REST APIs, GraphQL, Microservices, token-based authentication & security

Databases: MySQL, PostgreSQL, MongoDB, Supabase — schema design, queries, stored procedures, triggers

Cloud / Infrastructure: AWS, Vercel, Docker, Firebase, Cloudflare (R2/S3), DNS, deployments

Tools: Git, GitHub, GitLab, Postman, n8n (automation)

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer — Prospect1 (Panama)

Armenia, Quindío, Colombia · Hybrid · April 2023 – Present

- Build end-to-end full stack solutions with React, Next.js, TypeScript, NestJS and Node.js, from requirements gathering and architecture through implementation, integration and deployment.
- Contribute to platforms serving 12,000+ users, 300+ clubs and 100+ institutions, developing athlete management, sports evaluations, reporting and scouting features, with caching and state management via TanStack Query.
- Design and optimize SQL/NoSQL solutions with MySQL, PostgreSQL and MongoDB (tables, relationships, queries, stored procedures, triggers) across Dev/Prod environments, and respond to critical production incidents.
- Implemented asynchronous processing for bulk uploads of 1,000+ records using queues, Firebase and Server-Sent Events (SSE), plus automations that eliminated manual processes and improved operational turnaround.
- Build complex integrations with REST/GraphQL APIs: CRM, Meta, WhatsApp and AI services, including push notifications and occasional contributions to the mobile app built with React Native.
- Technical leadership and client communication: requirements gathering, presenting solutions, technical advisory, troubleshooting and onboarding new developers; branch, Pull Request and repository management on GitHub and GitLab.

Products: *Prospect1.team* (sports evaluations, reports, player profiles) · *admin.prospect1.team* (club administration, bulk uploads) · *Mercatto* (scouting and recruitment) · *Mobile app* (React Native, push notifications).

INDEPENDENT PROJECTS

VM Fashion / Lila Store — Beauty E-commerce Catalogs

Next.js, React, TypeScript, Supabase, Vercel

- Built full product catalogs (600+ products, 1,300+ optimized WebP images) with cart, authentication, pagination, filters and caching.
- Integrated payment gateways, built an admin panel and handled image management (Supabase Storage); deployment and DNS.

Inmobiliaria Velar — Real Estate Platform (monorepo)

React, Vite, NestJS, Google Maps API

- Built frontend and backend (NestJS) for property management and display, with Google Maps integration.
- Monorepo architecture with independent apps: admin panel, backend and website.

EDUCATION

Self-Taught Software Development — Udemy, official documentation and real-world projects (2022 – Present)

High School Diploma — Institución Educativa Normal Superior del Quindío (2011 – 2016)

Business Administration (incomplete) — Universidad del Quindío (2017 – 2020)

LANGUAGES

Spanish: Native

English: Basic/intermediate technical reading and comprehension
